DETAILED ACTION***Drawings***

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character “14” designated a *bulb socket* (spec., page 4, line 7) has been used to designate both *socket* and *bulb* (Figs.1-3). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Lee (US 5,412,554).

Art Unit: 2875

Leef discloses (Fig.2) an adjustable harp including a top member [3], two oppositely disposed legs [3a] and [3b] depending from the top member which are coupled to the arms [12] and having a first portion [2] and a second portion [3a,b] telescopically received within the first portion, and a locking means [12c] for locking the position of the first portion relative to the second portion.

Allowable Subject Matter

Claims 2, 3, 5 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Referring to Claims 2 and 5 the prior art of record fails to show an adjustable harp wherein a locking means includes a treaded splayed end upon a first portion and a threaded cap configured to mate with the threaded splayed end.

Referring to Claims 3 and 6 the prior art of record fails to show an adjustable harp wherein a resilient material is positioned between the end of the first portion and the cap.
